

NAZARBAYEV UNIVERSITY

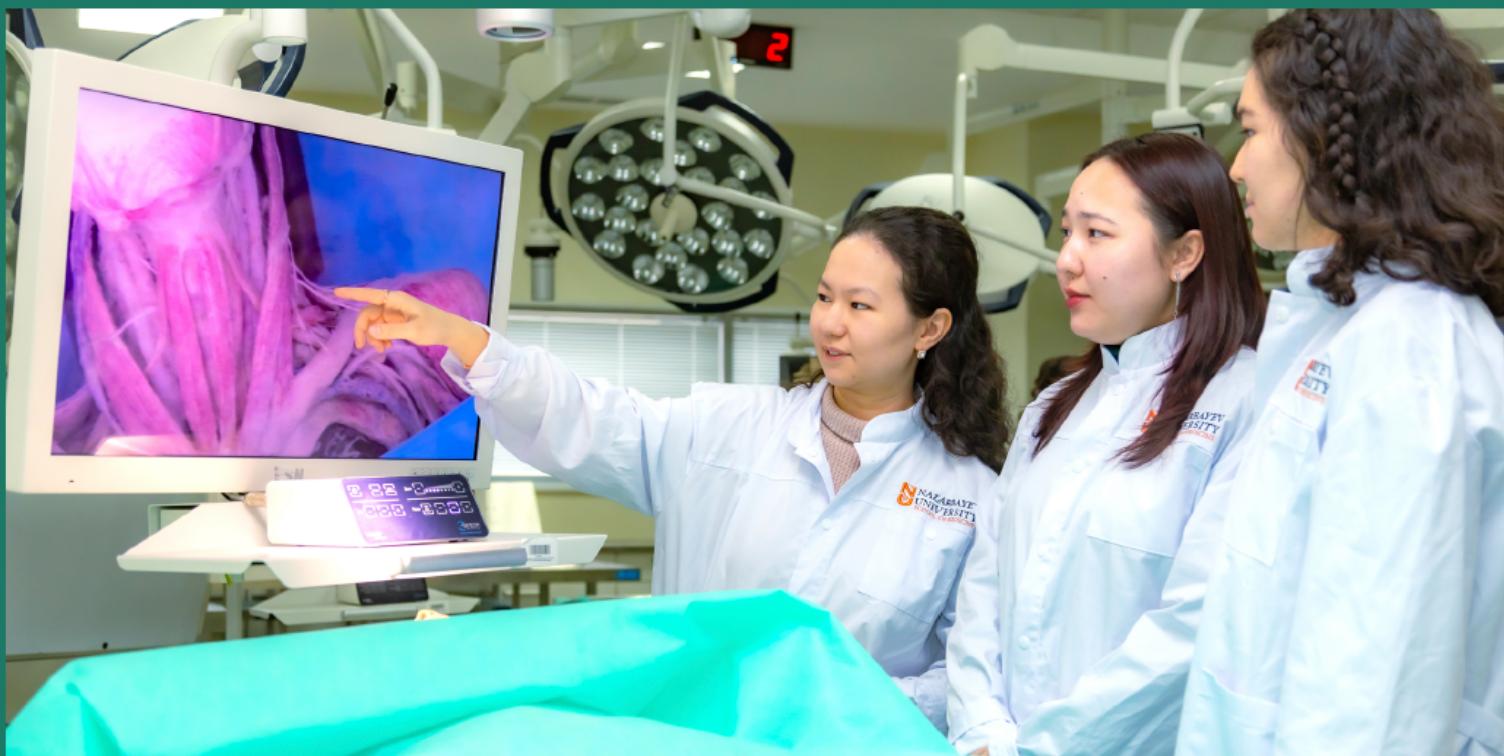

Astana, Kazakhstan

Nazarbayev University Medicine (NU Medicine) is a leading force in healthcare, education, and research in Kazakhstan.

By integrating its Medical School and University Medical Center (UMC), it aims to transform the country's healthcare system.

UMC, which includes three specialized hospitals, offers 46 high-tech medical services. Under the leadership of Dr. Yuriy Pya, the center has achieved global milestones, including the world's first total artificial heart implantation and the development of ALEM, a groundbreaking system for the normothermic preservation and long-term transportation of donor organs.

The Medical School trains future medical professionals through a range of programs, from bachelor's to PhD.

NU Medicine has earned international recognition: the Medical School is accredited by the WFME, and UMC is the first center in Central Asia to achieve JCI accreditation. The center is also known for its innovative procedures, such as organ transplants and the development of cancer treatments like CAR-T cell therapy.

NU Medicine is setting new standards in medical care, research, and education for Kazakhstan and beyond.
